

# What are the benefits of GM Food?

Also known as '**Genetically Manipulated Organisms**' (GMOs)

*GM Food, Genetically Modified Organism (GMO), and Transgenic food all mean the same thing.*

**Monsanto will not release their test results on GM Food. Why not?**

**Monsanto does not want GM Food clearly labelled. Why not?**

*Genetic manipulation (GM) results in the patenting of life, which includes: animals, plants, food and you - yes even you. GM also means that you must pay royalties for what you eat to a gene-tech corporation.*

The evils of tobacco & asbestos were hidden from us for years. Evidence now proves that wherever GM food is eaten allergies are on the rise. The pollen from Genetically Manipulated Crops is now blowing in the wind. GM is our new **CANE TOAD** but this **creeping** toad is proving very dangerous for our world.

A few scientists in high places have sold out to their egos and big business – learn what they don't say about GM food. Many scientists know the truth but remain silent for fear of offending their so-called colleagues or retribution by character assassination or being sacked. Scientists have already been sacked for warning of the dangers of GM food – *Just Google Dr Arpad Pusztai and GM potatoes.*

In Canada pregnant women and fetuses were found with *Bt* toxin in their blood. *Bt* toxin produced in a *Bt* cotton plant is more toxic than a commercial *Bt* spray. *Bt* (*Bacillus thuringiensis*) is engineered into cotton and grown in Australia. *Google Bt toxin in blood.* Most Fish & Chip shops cook in *Bt* cottonseed oil.

Genetic engineers are technicians and may do their job well, just as a plumber is a technician, but that plumber may still know nothing about the dam wall (read GM) that's bursting in the hills above the city.

Ecologists know that GM crops are destroying the genetic bridges that should be protected intact for our children's future. There are also many scientists who do worry about the health issues from GM, especially in children and the irreversible contamination of our gene pools by GM pollen. Sadly however, there are a few criminal scientists in high places, who push GM, and they have one agenda, and that is to sell the Monsanto lie about the safety of GM transgenic food. Their aim is to contaminate our world with patented DNA; it is carried in the pollen so then by law, all crops will belong to the likes of Monsanto.

Why allow Monsanto's goons to peddle the claptrap that they intend to give us more vitamins and cheaper food through genetic engineering? Monsanto is a chemical company – would a chemical company design plants that need fewer chemicals – let's get real! Canadian and US Farmers now get lower yields and use more chemicals than ever before with GM crops. GM is about the patenting of life starting with our food. Only a psychotic criminal or an ignoramus would promote the patenting life itself.

In those so-called '**educational programs**' on GM they'll say "By 2050 earth's population will be 9 billion so we'll need to feed them". On hearing that you'd believe that GM means more food. You can prove that it's a lie pushed by Monsanto who has an international history of lying. *Google - Benbrook GM and Monsanto convicted in France's Highest Court also Suicides in India thanks to Monsanto's GM cotton.* Across Europe they're now banning GM for safety reasons. See - [www.gmo-free-regions.org](http://www.gmo-free-regions.org)

If Monsanto's pollen lands in your crop then legally you don't own your crop; the DNA is patented. **Mercenary Lawyers** work for Monsanto, so farmers who refuse to pay royalties face a fine or prison. Those who talk '**choice for farmers**' talk nonsense. *Google - Farmers court contamination Monsanto*

US farmers have planted over a million acres of **Non-GM** soy to try and clean up, but contamination is now common. Years of GM have proven a costly failure: '**Cleveland Farm and Dairy USA**' - Farmers in the US have found that if animals are given a choice between GM and Non-GM food they will not touch the Genetically Engineered Food. You can read the farmers' reports at [DNAalert.net](http://DNAalert.net) To learn how seriously many scientists view the issue of GM food and crops and the allergies due to GM food - *just Google 'Scientists call for bans on GM for environmental and health reasons'*.

Our **Media whores** and **Prostitute politicians** never insist on labelling all GM Food honestly; why not? Just label it **CLEARLY IN LARGE PRINT** instead of that misleading microscopic farce à la *Monsanto's secrets*

Go to [DNAalert.net](http://DNAalert.net) watch: **Global alert GMO** then **SEEDS of DEATH** – You'll see how dangerous GM food is so then ask your Local Member to watch them both and demand a response – Tell them to "**Pass it to every Minister!**" Don't accept nonsense like "I'll pass it on to the relevant minister" Tell them; women are watching and networking – those promoting asthma in our kids through GMOs will be named.

In 1995 Dr TJ Higgins of CSIRO began to develop GM peas. In 2006 he stopped. On feeding the GM peas to mice the mice developed an illness worse than asthma plus other allergies – so they boiled the peas; same problem. The control group of mice fed **Non-GM** peas were OK. Then it was found that only the mice that ate the **GM** peas developed allergies to foods that were not GM. Instead of following up to see why GM food was so dangerous, TJ Higgins stopped all GM food safety trials. Paragraphs 1, 2 and 3 on page 57 of 'Genetic Roulette' by Jeffrey Smith will tell the story; yet the media's silence is deafening.

GM food entered our diets around 15 years ago, there has since been a sharp rise in allergies including asthma and anaphylaxis; ask any kindergarten or primary teacher. Some believe that we wash so much that we now have more allergies. Have we used soap so madly since they introduced GM food? Children's food allergies are up since we have fed them GM food; very few people eat soap anyway.

**Ask your doctor** – Are there any safe levels of allergens in food for children?

**Remember what happened to the mice after they had eaten the GM peas at CSIRO.**

**Dr TJ Higgins** now wants our children to eat GM food knowing that it caused serious reactions in mice; would it not then be criminal negligence for a doctor to **knowingly** recommend GM food for our children?

**Dr Jim Peacock**, ex CSIRO froze out a scientist of 23 years for speaking the truth about GMOs.

**Prof. Rick Roush** of Melbourne University is a stooge for Monsanto to push their criminal GM agenda.

After 1999 GM soy from the US began arriving in the UK, allergies to soy jumped from 10% to 50%. Massive protests over GM foods followed so supermarkets withdrew GM foods from sale and the rapid increase in anaphylaxis in children aged 0-14 stabilised. So why the media silence and also why the silence from a handful of GM scientists about what happened to the mice at CSIRO or what happened to the rats that ate the GM potatoes produced by Arpad Pusztai in the UK? See what you are not told by the likes of **TJ Higgins, Rick Roush** or **Jim Peacock**. *Just Google – Dr Arpad Pusztai potatoes UK.*

Someone has now allowed the planting of GM wheat in Australia when they know that allergies increase wherever GM food is eaten. Because of: contamination, court costs, lower yields and more chemicals due to GM, Canadian and US farmers will not plant GM wheat. So why plant GM wheat in Canberra, WA and now Victoria? By stealth they are moving GM wheat-pollen across our country to contaminate our crops ASAP. So then allergies will increase but also importantly, the DNA in GM wheat is patented.

**He who pays the piper calls the tune - So let's name the child abusers behind this outrage?**

We are now fed unlabelled GM: **soy emulsifier, corn syrup, cottonseed oil**, and **canola oil** which go into many foods including *Margarine* and that **so-called 'Vegetable Oil'**. Since GM **corn syrup** went into sweets for the kids the rise in allergies are everywhere, remember what happened to the mice at CSIRO after they had eaten those GM peas. The novel proteins from GM are bound to cause allergies, so why is all of this completely ignored by the President of the AMA? Does the President of the AMA fear to speak up about the information sweeping the world about the sickness from GM and the disinformation that we are fed on this issue? See: **Seeds of Death** and **GMO Global Alert** for free at **DNAalert.net**.

Those who lack any social conscience are usually called psychopaths or sociopaths. Do scientists and politicians who still push the GM lie have no social conscience? *Just Google - corporate psychopath.*

Food Safety of Australia and New Zealand (FSANZ) supports Monsanto's aim for a world of patented life forms and more asthma and anaphylaxis in our children – the criminal top brass at FSANZ know the truth

Genetic Manipulation (GM) is a fast-failing food technology; it takes only a few minutes to see the truth. You'll find that GM means – contamination of our gene pools, patented DNA, corporate food control, and more sickness for our children but definitely **no extra food**. That **Patented DNA** that is now floating in pollen could be with us for eternity. You or any High School Student can verify this information.

**Watch carefully - Monsanto, Cargill, Bayer/Aventis, DuPont, Dow, Syngenta, Novartis and AstraZeneca** as their quislings sneer at these facts while they continue to sell us out to the contamination of our food and more allergies for us all. Their thugs will perform character assassinations on anyone who challenges them, but we've seen it all before – All money lacks a social conscience - sadly 1% to 2% of people with big money do the same.

Go to **Concerned Mothers of Australia** at – [www.madge.org.au](http://www.madge.org.au) - *also* - [www.responsibletechnology.org](http://www.responsibletechnology.org)

Two more Australian sites really worth a look - [www.geneethics.org](http://www.geneethics.org) - *and* - [www.non-gm-farmers.com](http://www.non-gm-farmers.com)

You will have noticed that '**Genetic manipulation**' does not mean '**Traditional Selective Breeding**'.
